Seminars/Talks 2025

Date	**Presenter**	**Institution**	**Title**	**Recording** *(If available)*
June 10, 2025	Dylan Simpson: “Consequences of Changing phenology" Gwen Kirschke: “Nectar in Changing Climate” Savannah Troy: “Biodiversity in Changing Ecosystems” Becky Irwin: "How do we Manage Landscapes to Reduce Bee Disease and Increase Bee Health?"		RMBL Research Sampler	Recording
June 17, 2025	Lauren Carley	University of Chicago	Causes and consequences of intraspecific variation in plants.	Recording Unavailable for Sharing
June 24, 2025	Ashley Prentice	Colorado State Forest Service	Carbon in Colorado's Forests: Tracking Stocks and Flows	Recording

			Across Ecosystems and Wood Products	
June 25, 2025	Jerry Frank	University of Missouri	Telling Stories: Our Public Lands and Power in the Colorado Rockies	Recording
July 1, 2025	Nick Haddad	Michigan State University	A half-century debate resolved: habitat fragmentation reduces biodiversity	Recording
July 8, 2025	Mike Moore	University of Colorado Denver	Mating and the environmental limits of species on a changing planet	Recording
July 9, 2025	Paul Caradonna, PhD and Mark Dorf	Chicago Botanic Garden and Northwestern University & Arist Colab	Art/Science Exchange – Gothic Artists in Residence Talk and Discussion	Recording not available
July 15, 2025	Israel Borokini	Montana State University	Ecological resilience and temporal beta diversity of plant communities across the 20 NEON eco-climatic domains	Recording
July 22, 2025	Mariah Carbone Emily Mooney Brad Taylor Ian Breckheimer		Carbone: Montane Forest Soil CO_2 Fluxes in a Warming Climate Mooney: Ant-herbivore mutualisms in a changing climate Taylor: Elements of taste, nature's chefs, and future eating Breckheimer: The Colorado Headwaters Ecological Spectroscopy Study: Scaling Ecosystem Drought Responses from Leaf to Watershed	Recording

July 29, 2025	Annika Nelson	Texas Christian University	Causes and consequences of biodiversity effects in mutualisms.	Recording not available
